

**To the Quality Manager**

Châteaudun, on 02/06/2025

**Conformity with REACH regulation**

Further to your request about the enforcement of REACH regulation in our company, we inform you that we are not considered as manufacturer or importer outside EU of chemical substances but only as user; so we are not concerned with the REACH pre-registration.

However we did contact our suppliers for chemical substances included in some articles, in order to check their intention of doing the pre-registration for their own substances, to plan using, and so, to guarantee our supplies perennality. We did also contact our suppliers to check that the specific quality of the products provided would not be altered by REACH regulation and that these products do not contain any worrying substances that could be later completely forbidden.

Our suppliers send us many reassuring replies on the European REACH regulation n°1907/2006 dating from 2006 and its latest amendments from January 2025 (247 substances), and we stay in direct contact with them on this specific subject.

We can assure you that we are making great efforts to guarantee our supplies perennality and the legal using of chemical substances in our company. We are very confident for the future.

Do not hesitate to contact us for further details. We will be pleased to provide any extra information you may require.

Yours faithfully,

**Vincent Muzica**  
*President of TRELEC*
